

Product Overview

1

Mounting

The UH104 can be used as a freestanding device. But it also features built-in brackets for easy DIN rail or panel mounting.

2

Connect Your USB Cables

USB Power

The UH104 is powered by the upstream 5 VDC USB bus. It provides a maximum of 100 mA to each of the downstream ports.

Automatic Installation

The operating system will automatically install the necessary drivers when the UH104 is plugged in.

Portable USB Isolation

UH201

Compact USB Port Guardian

2 kV Isolation is as close as your pocket. Use the UH201 USB Port Guardian to protect your laptop while connecting to remote devices for field service or programming. Just plug it into your laptop's USB port, connect your USB cable, and you're ready to go.

Due to the nature of isolation and USB, bandwidth will be set to 12 Mbps when using the Port Guardian.

Additional USB Hub Options

UHR204

Heavy Industrial powered USB hub

The UHR204 is a four port USB hub with a barrel connector and terminal block for external power. When operating on bus power it provides 100 mA to downstream ports. But when using external power it provides 500 mA to each downstream port.

UHR304

Heavy Industrial powered USB hub with isolation.

Like the UHR204, the UHR304 is a four port USB hub with a barrel connector and terminal block for external power. It provides 500 mA to each downstream port. But it also adds isolation, protecting connected devices from ground loops and data loss.

Troubleshooting

The UH104 hub is installed, but a downstream device doesn't seem to be working.

Some USB devices get their power from the USB cable. The UH104 will only provide 100 mA to the downstream ports. If your downstream devices need more than 100 mA, you should use a powered USB hub like B&B Electronics' UHR204. A powered USB hub will provide 500 mA to the downstream ports.

Do I need drivers for a USB hub?

No, the operating system will detect the UH104 and install the drivers automatically.

How can I be sure it has been installed?

The new hub will be listed in your Device Manager.

Can I use USB 1.1 and USB 2.0 devices together?

Yes. USB 2.0 is backwards-compatible with USB 1.0 and USB 1.1.

B+B SMARTWORX **QUICK START GUIDE**

UH104

Industrial 4-Port USB Hub

✓ First Things First...

Before you begin, be sure you have the following:

- ☐ 4-Port Industrial USB Hub
- ☐ Required but not included
 - ☐ USB cable
